(54) Title: METHODS OF PREPARATION OF LIVE ATTENUATED BACTERIAL VACCINES BY ALTERATION OF DNA
ADENINE METHYLASE (DAM) ACTIVITY IN THOSE BACTERIA

(57) Abstract: Live attenuated bacteria vaccines are provided. Also provided are methods by which such vaccines can be obtained, including: a method by which a copy of the *dam* gene from a pathogenic bacteria is cloned into a plasmid capable of replication in the same bacteria species such that it is overexpressed from either a *lac* promoter, *tac* promoter, *araBAD* promoter, *trc* promoter, *trp* promoter, T7, SP6, or T5 bacteriophage promoters, a native promoter from that species, or other appropriate promoter. The plasmid containing the *dam* gene is then transferred into the pathogens to cause increased expression of Dam resulting in the formation of a live attenuated bacterial vaccines. Alternative methods for producing the vaccine are also provided including altering or replacing the chromosomal promoter for the native *dam* gene so as to alter Dam expression or mutating or replacing the native *dam* gene so as to alter the expression of Dam in a pathogenic bacteria.

☐ Further documents are listed in the continuation of Box C.

☐ See patent family annex.

* Special categories of cited documents:

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
